

HOSE SALE!

PRICES GOOD
OCT 15 - DEC 15, 2020

BASIC HOSE SAFETY:

- The hoses are usually color coded: – Oxygen (green) – Acetylene (red)
- Be careful around sharp objects, they can be cut very easily.
- Hoses are constructed of flame retardant materials, but will burn if there is a flashback or exposed to sustained heat.
- Hoses are graded - Make sure you are using the right hose for the right gas.
- Keep hoses clear of any falling metal, slag or sparks.
- Never allow hoses to become coated with oil, grease or dirt. Such coatings could conceal damaged areas.
- Examine the hoses before attaching to torch handle.
- If cuts, burns or damaged fittings are found, replace the hose.
- Completely replace hose if it contains multiple splices or when cracks or severe wear is noticed.
