

WHAT MATTERS IS INSIDE

Our Environmental Gas standards ensure environmental safety and meet regulatory requirements.

CERTIFIED • QUALITY • AVAILABILITY

Environmental gases to meet the unique needs in the following areas:

- Standards for CEM and Stack Gas Monitoring
- Automotive Exhaust Emission Standards
- Ambient Air Monitoring Standards
- Low Level NO Mixtures
- EPA Protocol Gases
- Confined Space Entry
- Soil Remediation Calibration Standards

The Clean Air Act sets numerical limits on the concentrations of a basic group of air pollutants and provides reporting and enforcement mechanisms. The production process for these gases is exact and time consuming. Purity Plus Specialty Gases by Weldstar has the cylinder preparation processes and SOPs in place to ensure both full EPA compliance, and availability you can count on.
