

CUSTOMIZED TRAINING PROGRAMS

Technical expertise & application support

The seamless integration for automation in the job shop makes learning the process easier, allowing you to concentrate on other areas of your business.

We offer a variety of training programs for our customers.

"Thank you for making available your facility for our engineer welding training class. Our engineers came away from the training with a greater knowledge of welding. Using your facility was an outstanding opportunity to get away from the pressures of the job-site and dig into the basic skills. The knowledge gained and the relationships built are an investment in both of our futures."

JOHN L. HOMER
Director of Continuous
Quality Management

- Each training program is individually tailored for the needs and requirements of the target audience
- Prior to scheduling training, a Weldstar/Depke technical representative will meet with the appropriate person to discuss their expectations of the training program
- Programs can run as short as thirty minutes and as long as several days. Depth of coverage, area of concentration, and number of people to be trained is taken into consideration when determining the length of training.

PROGRAMS INCLUDE:

- Abrasive Selection and Safety
- A.W.S. Codes and Classifications
- Basic Welding Processes
- Cylinder Handling and Regulator Safety
- Laser Gas Delivery Systems
- Oxy-Fuel Safety
- Plasma Cutting and Safety
- Welding Safety

"Most knowledgeable considerate people in the trades towards working with. Love the shop, service and readily available supplies. Their service repair guy is the best and the entire team has helped save me thousands!!! Will not shop elsewhere!"

JAMES DIRT DORNER
ArtByDirt

Together, Weldstar / Depke and its customer tailor a program that best addresses those expectations. We often involve outside experts in their training to enhance its programs.
